Browser size

1024px by 768px

Font information

Name: Roboto

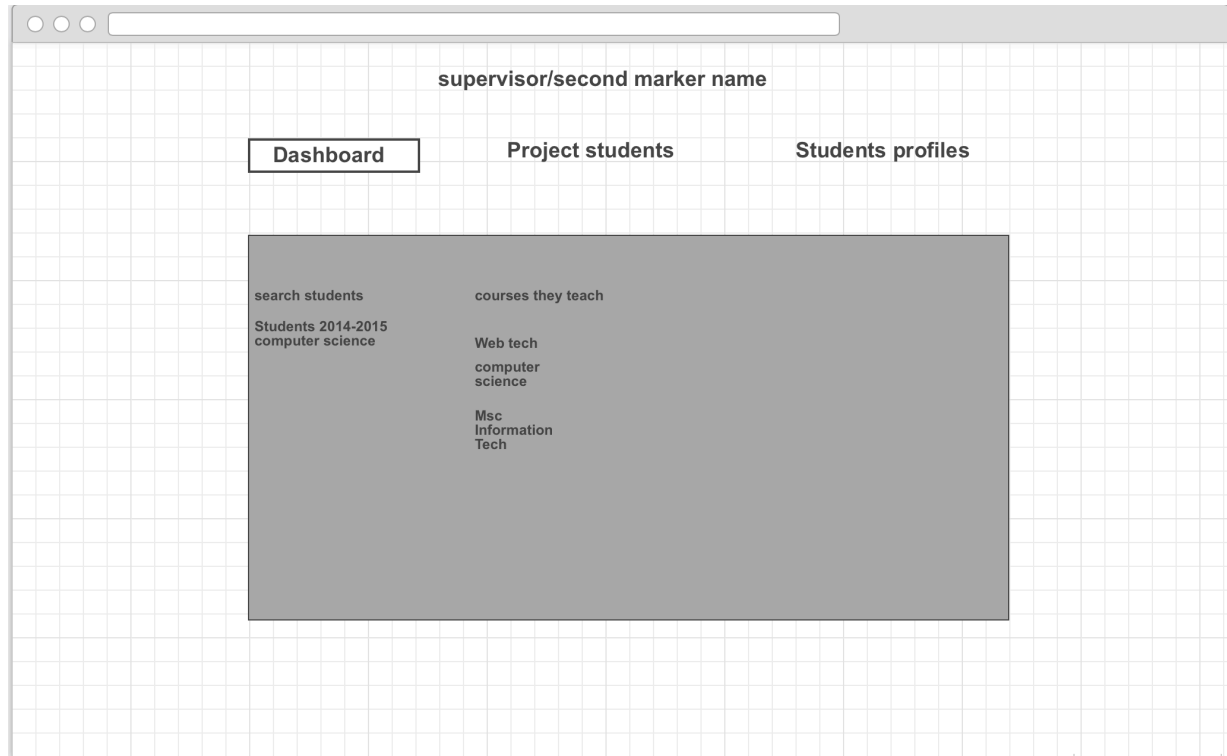

Weight: thin, light, regular, medium, bold and black. All these is in the GitHub folder

GreenwichCodeZero/Documentation>Design>Typography.

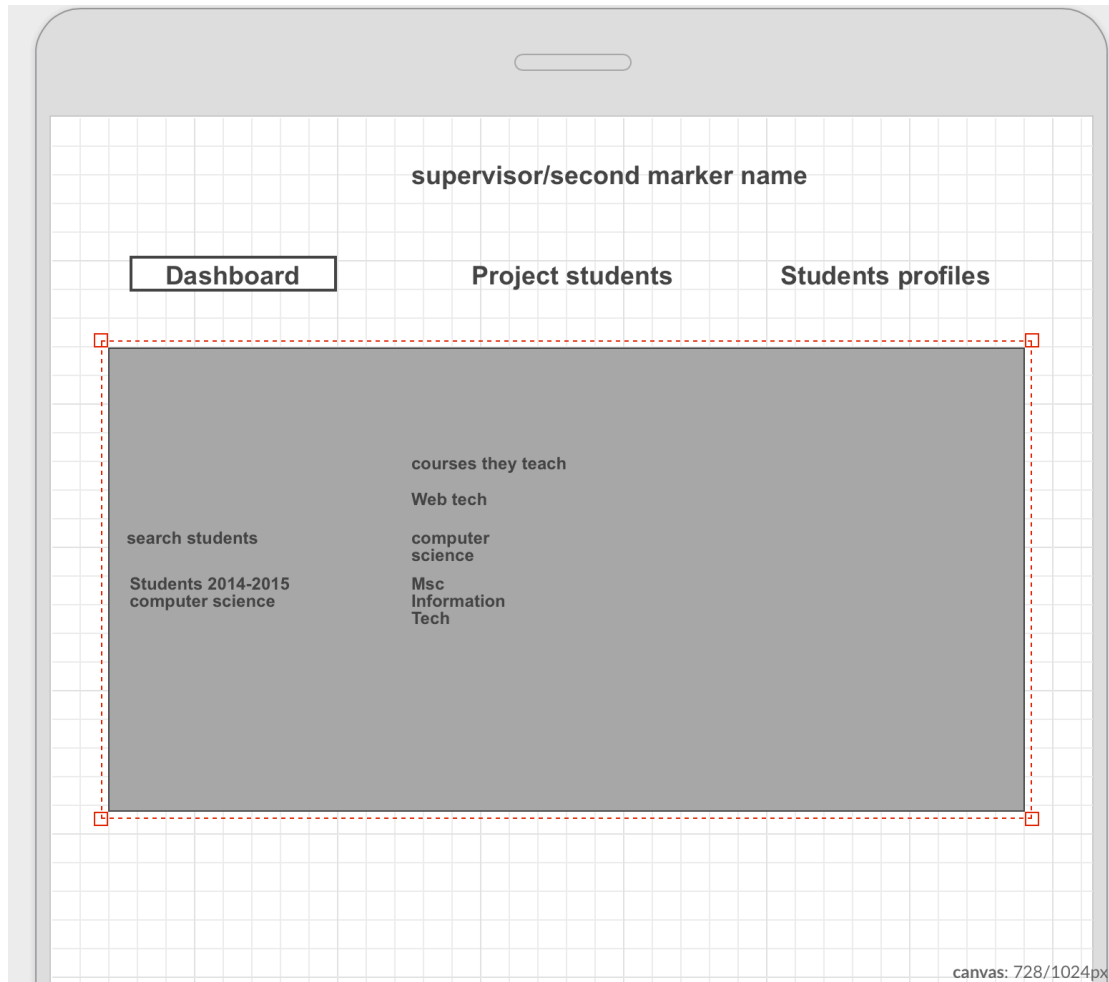

Prototypes

Supervisor/ second marker Dashboard

Browser version

Tablet version

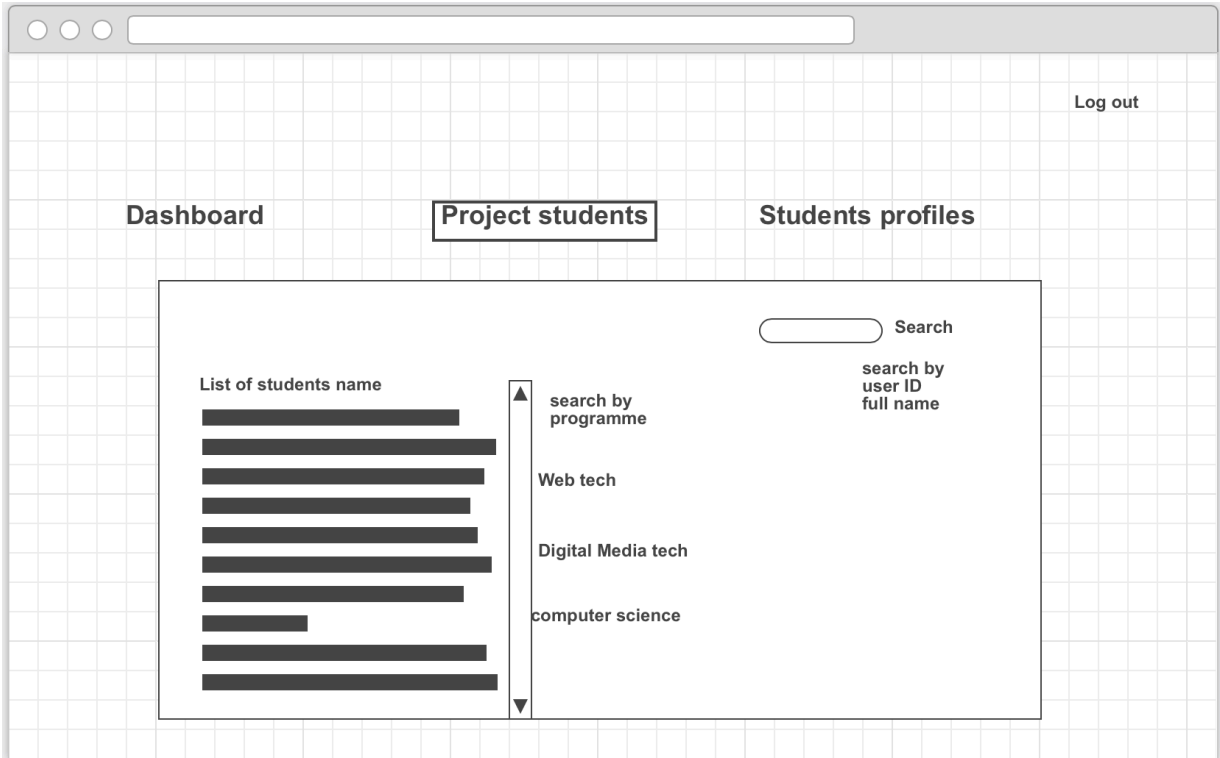

Supervisor dashboard should have all the information about their previous students (projects)

Information about the courses they teach and also the courses they are doing.

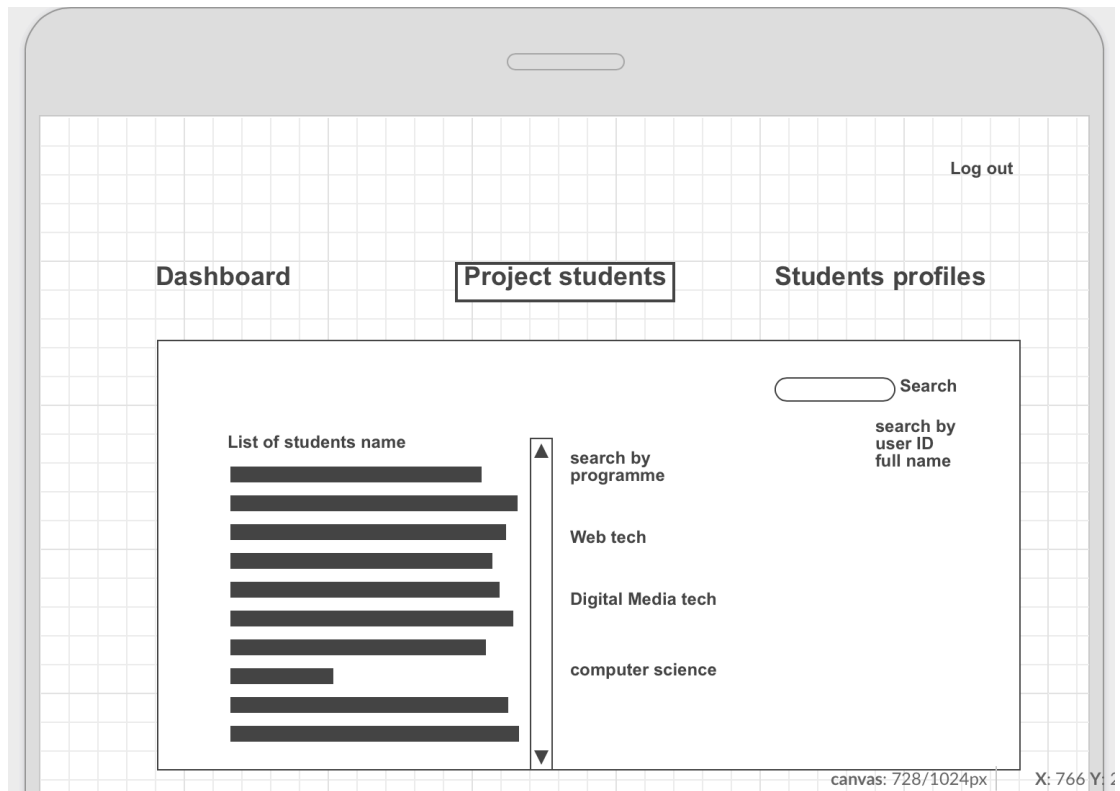

Second marker would have the same dashboard as he/she would be allowed to view students details and projects.

Project student

Browser version

Tablet

Search engine: staff must be able to search the student they are after by student ID number, user ID or full name (first name and surname)

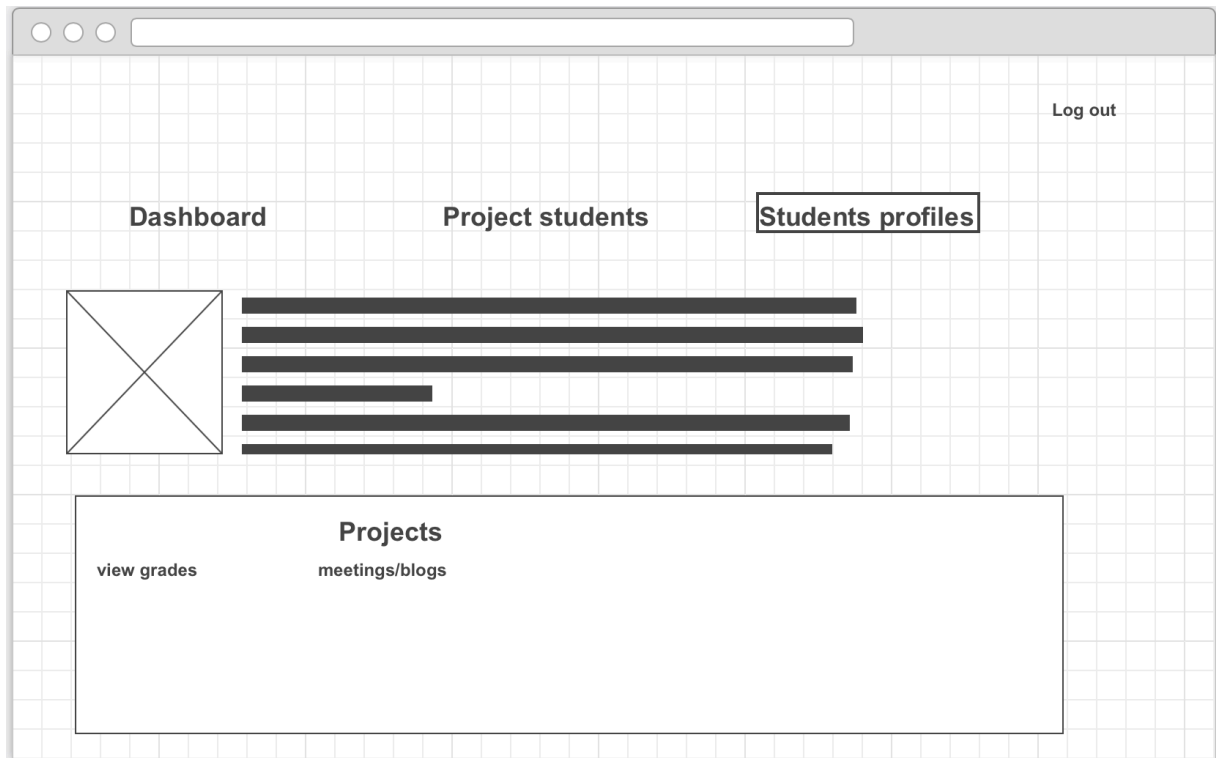

List of student on the site as the staff is assigned to those students.

Staff can also search his project students by their programmers.

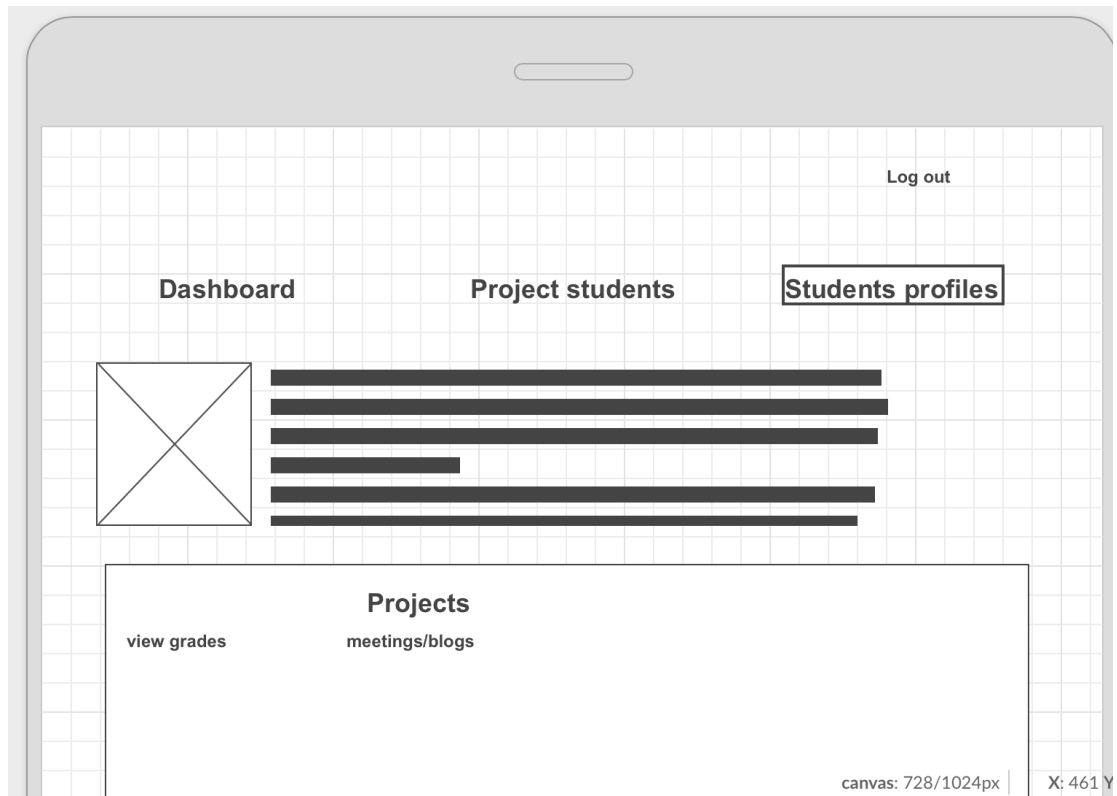

By clicking onto the students name the link should take the staff into all the blog, meetings, ect...

Student profiles

Browser version

Tablet

Student profiles, would have all the information about them.

Picture of the student

User id, student ID, email address, what program they study. Emergency contact, supervisors/ second marker, ect...

At the bottom there' an box that contains all the information about their grads at the university. View their project details, second and first years results/ coursework.
